•	•	•	products, and the fact that they didn't have a cross-fu on the big picture.	nctional team to collaborate

## Ce Level Data

The district needed something to guide them and give them rich data to make the best decisions. Now with ROI, we have the data and know what to do with it. This is a place everyone from my team can go in and grab what they need to achieve our goals and our student goals.

## **The Solution**

ROI's ability to analyze expenditure and instructional data and correlate it to academic outcomes turned out to be just what the Darlington County School District needed to allocate resources strategically. The real-time reports and analytics empowered the district to evaluate the effectiveness of academic resources, while its ease of implementation lent itself to a seamless process. Benjamin reflected, "As educators, sometimes promises are made by some vendors and they don't come through for us. Level Data told us they would pick up some of the heavy lifting, which they did. This is one of the easiest implementation processes I've been through in my 25 years in public education."

## • • Results

The implementation of ROI showcased the transformative potential of data-driven budgeting for Darlington County Schools and led to significant improvements overall. Already, this has allowed quick insight into all the applications being used across the district as they are now able to allocate resources more effectively, maximizing the impact on student success.

Using ROI's reports, they have also been able to improve academic outcomes by evaluating the efficacy of educational programs and making data-driven
 adjustments. And finally, they have empowered the districts' educators and administrators by equipping them with data to make informed decisions, fostering a
 culture of continuous improvement.
